vivere a colori
living with colours

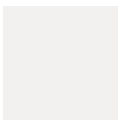

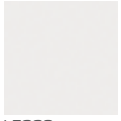

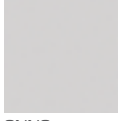

La ricerca sul colore, portata avanti con coerenza e professionalità, da oltre 40 anni, si concretizza in una nuova gamma di prodotti da pavimento e rivestimento che costituiscono un progetto organico fatto di nuovi colori, superfici e formati tra loro compatibili. Il gres porcellanato bianco offre una superficie compatta e resistente, dai colori più brillanti e saturi: le materie prime selezionate che formano il supporto garantiscono la totale assenza di impurità e di conseguenza una migliore distribuzione del colore.

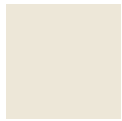

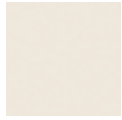

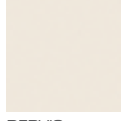

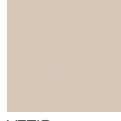

Research into colour, carried forth consistently and professionally for more than 40 years, takes shape in a new range of wall and floor products that form a systematic project made of new colours, surfaces and sizes all modular with each other. White porcelain stoneware offers a compact, hardwearing surface with the brightest and fullest colours. The selected raw materials that make up the support ensure a total absence of impurities and a better distribution of colour as a result.

Il colore è per eccellenza la parte dell'arte che possiede un dono magico.
 Mentre il soggetto, la forma, la linea si rivolgono prima di tutto al pensiero, il colore non ha nessun significato per l'intelligenza, ma ha tutti i poteri sulla sensibilità, provoca delle sensazioni.
 Il mondo è disegnato dalla luce e plasmato dal colore.
 Il colore muove, esprime, sussurra, diverte. Il colore si intreccia con fantasia generando trame di materia e di racconti.

The colour is part of the excellence that has a magical gift.
 While the subject, form, line turn first of all in thought, the color has no meaning for the intelligence but all powers on sensitivity, causing sensations.
 The world is drawn by the light and defined by colour.
 Colour moves, expresses, whispers, amuses.
 Colour confuses with fantasy, creating new material and tales.
